TD - IE 60 Intelligent Fresh Extraction Beverage Solution

Innovative Extraction Technology, Engineering Professional Quality

Intelligent Devices

Management System

Data Assets

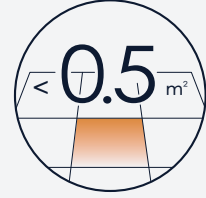

Freshly Ground · Freshly Extracted · Served Instantly Professional-Grade Flavor

Equipped with precision grinding and high-pressure extraction, the device grinds and brews coffee beans and whole-leaf tea on demand, precisely controlling water temperature, volume, and extraction time, while preserving coffee oils and tea polyphenols for a taste on par with specialty coffee shops and gongfu tea.

QR Code/Touchscreen Dispensing, Quality and Efficiency Perfect

Fully automated end-to-end operation, no need for professional baristas or tea masters. Simply scan or select to dispense, ensuring consistent and standardized flavor. Fresh-brewed tea: 60 - 180s per cup; pre-steeped tea: 8 - 20s per cup, efficiently adapting to fast-paced service environments.

Compact and Highly-adaptable, Effortlessly Fits Diverse Scenarios.

Supports freshly brewed pure tea, tea latte, light milk tea, milk tea, American coffee, latte, and more. Validated in real-world scenarios, it has been deployed across various space-constrained store environments, increasing average ticket size and improving staff productivity.

Basic Information		TD - IE 60	Basic Information		TD - IE 60
Dimensions (mm)		Width 600 × Depth 600 × Height 1635	Room Temperature Containers		4
Material		304 Stainless Steel	One-Click Recipe Deployment		Supported
Power		3300W	Network		Standard Wi-Fi, optional 5G
Screen		10.1-inch multi-touch smart screen	IoT Functionality		Supported (cloud-based device monitoring and management)
Number of Ingredient Containers		Standard 13	Dispensing Control		Dual Closed-Loop Weight Feedback
Refrigerated Containers		6	Cleaning Method		One-click software cleaning (rules set up uniformly from the cloud)
Refrigerated Tubing		End-to-End Refrigerated Piping	Daily Capacity		600 cups/day(including hot beverages)

TEDIA's Customer Success Experts Support You Every Step of the Way Comprehensive Assurance at Every Stage

We assist you in selecting or customizing freshly made beverage recipes tailored to your business needs. Our team ensures the machine and ingredients are optimally calibrated and provides training for your staff on machine operation, system usage, and data analytics. We also ensure seamless integration with your existing systems, so you're ready to go right away. From pre-sales to after-sales, we are committed to customer success, giving you complete peace of mind.

TEDIA pioneered the intelligent beverage dispensing business model and technical solutions, and continues to drive the digital transformation of the freshly prepared beverage industry through advanced technology, empowering industry growth and sharing a better life with the world. Serving tea, coffee, and dairy-based freshly prepared beverage chains worldwide, TEDIA provides the TD-I Series intelligent dispensing equipment, systems, and services. At the same time, for diversified offline retail and foodservice formats, TEDIA offers integrated solutions combining smart equipment systems (such as the TD-VC series), beverage formulations, and freshness-locked ingredient systems, enabling deployable light-operation capabilities for freshly prepared beverages. TEDIA's intelligent beverage dispensing solution makes freshly-crafted drinks a part of everyday operations in offline food service and retail businesses.
