Screen	10.1-Inch Multi-Touch Smart Screen	IoT Functionality	Supported (Cloud-Based Monitoring and Management)
Ingredient Containers	Standard 8	Dispensing Control	Weight-Based Feedback Control
Refrigerated Tubes	4	Cleaning Method	One-click Software Cleaning (Rule Set-up and Synchronised Uniformly from the Cloud)
Chilled Piping System	End-to-End Refrigerated Piping	Daily Capacity	1200 cups/day

TEDIA's Customer Success Experts Support You Every Step of the Way Comprehensive Assurance at Every Stage

We assist you in selecting or customizing freshly made beverage recipes tailored to your business needs. Our team ensures the machine and ingredients are optimally calibrated and provides training for your staff on machine operation, system usage, and data analytics. We also ensure seamless integration with your existing systems, so you're ready to go right away. From pre-sales to after-sales, we are committed to customer success, giving you complete peace of mind.

TEDIA pioneered the intelligent beverage dispensing business model and technical solutions, and continues to drive the digital transformation of the freshly prepared beverage industry through advanced technology, empowering industry growth and sharing a better life with the world. Serving tea, coffee, and dairy-based freshly prepared beverage chains worldwide, TEDIA provides the TD-I Series intelligent dispensing equipment, systems, and services. At the same time, for diversified offline retail and foodservice formats, TEDIA offers integrated solutions combining smart equipment systems (such as the TD-VC series), beverage formulations, and freshness-locked ingredient systems, enabling deployable light-operation capabilities for freshly prepared beverages. TEDIA's intelligent beverage dispensing solution makes freshly-crafted drinks a part of everyday operations in offline food service and retail businesses.
