TD - ID 750 Desktop Intelligent Beverage Dispenser

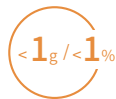

Compact Size, Powerful Performance

TD - ID 750 Desktop Intelligent Beverage Solution

Equipped with TEDIA's Core Patented "Weight Feedback Dispensing" Technology, this mini-sized unit delivers powerful performance.

Fast Dispensing Speed

Low Margin of Error

High Production Capacity

High Stability

End-to-End Refrigerated Piping

Cloud-Based Recipe Management

Touchscreen or QR Code Scanning for Instant Dispensing

Modular Design & Manufacturing. Easy Maintenance & Troubleshooting

Certified under ISO 9001, ISO 20000, and ISO 27001 Management Systems

OTA Continuous Software Upgrades

Basic Information	TD - ID 750	Basic Information	TD - ID 750
Dimensions (mm)	Width 750 × Depth 705 × Height 800	Power	650W
Screen	10.1-inch multi-touch smart screen	Network	Standard with Wi-Fi, optional 5G
Number of Ingredient Containers	Standard configuration of 9	Refrigerated Containers	8 tank
Room Temperature Containers	2 tubes (supports customizable external modules)	Heated Syrup Tank	1 tank
Number of Tubes	9	Tubing Configuration Options	8 refrigerated ingredient containers (5L*4, 2.5L*4)+ 1 syrup tube (2.5L)
One-Click Recipe Sync	Supported	IoT Functionality	Supported (Cloud-Based Device Monitoring & Management)
Dispensing Control	Weight-Based Feedback Control	Cleaning Method	One-click software cleaning (rules set up uniformly from the cloud)
Chilled Piping System	End-to-End Refrigerated Piping	Daily Capacity	2000 cups/day

★ The TD-ID 750 is equipped with TEDIA's core patented "Weight Feedback Dispensing" technology, which ensures an average dispensing error of less than 1g / <1%, even for viscous ingredients. This allows rich fruit teas and dairy-based drinks to be perfectly replicated with one click, maintaining the exact flavor developed during R&D.

TEDIA's Customer Success Experts Support You Every Step of the Way

Comprehensive Assurance at Every Stage

We assist you in selecting or customizing freshly made beverage recipes tailored to your business needs. Our team ensures the machine and ingredients are optimally calibrated and provides training for your staff on machine operation, system usage, and data analytics. We also ensure seamless integration with your existing systems, so you're ready to go right away. From pre-sales to after-sales, we are committed to customer success, giving you complete peace of mind.

TEDIA pioneered the intelligent beverage dispensing business model and technical solutions, and continues to drive the digital transformation of the freshly prepared beverage industry through advanced technology, empowering industry growth and sharing a better life with the world. Serving tea, coffee, and dairy-based freshly prepared beverage chains worldwide, TEDIA provides the TD-I Series intelligent dispensing equipment, systems, and services. At the same time, for diversified offline retail and foodservice formats, TEDIA offers integrated solutions combining smart equipment systems (such as the TD-VC series), beverage formulations, and freshness-locked ingredient systems, enabling deployable light-operation capabilities for freshly prepared beverages. TEDIA's intelligent beverage dispensing solution makes freshly-crafted drinks a part of everyday operations in offline food service and retail businesses.
